Career Objective

Computer Science and Engineering undergraduate at American International University-Bangladesh (AIUB), seeking the Junior UI/UX Designer position at Metafour Asia. Passionate about understanding user needs, simplifying complex requirements, and creating intuitive, visually appealing web and mobile experiences. Interested in user-centered design, wireframing, prototyping, and interface design using Figma. With working knowledge of front-end development, eager to collaborate closely with developers to create functional, accessible, and user-friendly digital products while continuously improving design skills.

Education

- **Bachelor of Science in [Computer Science & Engineering]** - American International University-Bangladesh (AIUB) | Expected graduation: [2027] CGPA-3.61
- **Higher Secondary Certificate (HSC)** - Jashore Shikkha Board Govt. Model School And College | Jessore Education Board | [2023] GPA- 4.58
- **Secondary School Certificate (SSC)** - Arpara Government Ideal High School | Jessore Education Board | [2021] GPA- 4.39

Projects & Relevant Practical Experience

Ride Share App - UI/UX Design and Front-End Integration

- Researched rider and driver needs and defined user personas, journeys, and core user flows (booking, tracking, payment, trip history).
- Designed wireframes, mockups, and an interactive prototype for the mobile app in Figma, applying usability and accessibility best practices.
- Built a consistent design system (colors, typography, reusable components) to keep the interface simple and intuitive.
- Converted Figma designs to HTML/CSS and integrated them with the application's front-end and back-end.
- Connected the UI with business logic for ride request and matching, fare estimation, trip status updates, and payment handling.
- Collected feedback from peers, tested the prototype, and refined the design through iterations.

Airlines Management System - Web Application

- Simplified complex requirements (flight search, booking, passenger management, admin panel) into clear user flows and screens.
- Designed the web interface and dashboards in Figma and implemented them with front-end technologies, integrated with a database.
- Integrated the UI with business logic such as seat availability, fare calculation, booking validation, and role-based access for admin and passengers.
- Worked in a team, sharing design decisions with developers and considering technical feasibility.
- Prepared project documentation and presented the system workflow clearly.

E-Commerce Website - UI/UX Design and Development

- Designed the complete shopping experience in Figma: home, product listing, product details, cart, checkout, and order tracking.
- Created wireframes, responsive layouts for web and mobile, and a clickable prototype for usability testing.
- Implemented the UI with front-end technologies and connected it with business logic: product search and filters, cart and quantity updates, price and discount calculation, user authentication, and order processing.
- Improved the checkout flow based on user feedback to reduce steps and make payment simple.

Skills

- **UI/UX Design:** User research, personas, user flows, wireframes, mockups, prototyping; web and mobile UI/UX; usability and accessibility best practices
- **Design Tools:** Figma, Sketch, Overflow, Mockup tools, Adobe Photoshop
- **Figma to HTML:** Converting Figma designs into responsive HTML/CSS front-end pages
- **Front-End Development:** HTML, CSS, JavaScript; working closely with developers on implementation and integration
- **UI Integration and Business Logic:** Integrating UI with business logic and back-end APIs: form validation, authentication, cart and booking workflows, dynamic data display, state handling
- **E-Commerce Design:** Designing e-commerce websites: product pages, cart, checkout, order flow, responsive web and mobile layouts
- **AI Tools:** Using AI tools for research, design ideas, and prototype development
- **Product Thinking:** Simplifying complex user requirements; translating research insights into designs; UX content and documentation
- **Communication:** Fluent in English and Bangla; strong verbal and written communication; ready to submit a Video CV
- **Soft Skills:** Team player, flexible and friendly, patient, good at listening and accepting feedback, eager to learn and keep up with design trends

Languages

- Bangla
- English (fluent)
